An "ISRO Mission Knowledge Graph" would be a **super lovable Indian project**—perfect for students, space enthusiasts, and educator tracking Chandrayaan-3. It connects launches, rockets, satellites, scientists, and future missions like a "space family tree."

Project: "ISRO Mission Navigator"

Tagline: "**Launch to Legacy** "

What It Does: Click "Mangalyaan" → see "PSLV" rocket → "Madhavan Nair" scientist → "Next Mars Mission?" answer. Real-time answers like "Which rocket launched most Indian satellites?" or "Chandrayaan chain to Shukrayaan."

Indian Datasets (Ready-to-Use):

```
1. **Primary**: "ISRO Satellite Mission List" (Kaggle)
   Link: https://www.kaggle.com/datasets/sudhanshukumar1309/isro-satellite-list
   Columns: Satellite Name, Launch Date, Rocket, Orbit, Purpose (Communication/Remote Sensing)

2. **Launches**: "ISRO Spacecraft Launches" (Kaggle)
   Link: https://www.kaggle.com/datasets/anoopjohny/isro-dataset
   100+ missions: PSLV-C62, GSLV-F15, LVM3-M6 (up to 2026)

3. **Official**: Satish Dhawan Launch Data
   Link: https://dataful.in/datasets/5812/
   Launch dates, mission names, payload, status (PSLV-C62/EOS-N1 Jan 2026!)

4. **Bonus**: Wikipedia ISRO + News API for upcoming (Gaganyaan, Bharatiya Antariksh Station)
```

Simple Graph Connections:

```
Nodes: Chandrayaan-3, PSLV-XL, Sivan, LVM3, Gaganyaan
Edges:
- "launched_by" (Chandrayaan → PSLV)
- "designed_by" (PSLV → ISRO Scientists)
- "next_mission" (PSLV-C37 → SSLV-D3)
- "same_rocket_family" (PSLV → GSLV)
```

Real-Time Problems Solved:

1. **Students**: "PSLV vs GSLV difference?" → Visual rocket evolution tree
2. **Exams**: "Chronological order of Mars missions?" → Timeline path
3. **Public**: "Chandrayaan success rate?" → Green success nodes
4. **Future**: "Gaganyaan rocket confirmed?" → Latest LVM3 connections

Fun Indian Features:

```
💥 Click "Aryabhata" (1st satellite) → 1975 launch animation
🎵 Hover rockets → ISRO launch countdown audio
🇮🇳 Color code: Green=Success, Red=Partial, Blue=Foreign Satellite
📱 Share: "My PSLV family tree" WhatsApp image
🎮 Quiz: "Connect Rohini to Aditya-L1 in <10 clicks"
```

Same 5 Modules (Super Easy):

```
1. Data: Load Kaggle CSVs (5 mins)
2. Extract: "PSLV-C37" (Rocket) → "launched" → "102 satellites" (Record)
3. Graph: Neo4j with 500 nodes (ISRO scale = tiny!)
4. Search: "K.Sivan missions?" → All connected projects
5. Dashboard: React with rocket emojis + launch videos
```

Why People Will Love It:

```
✅ **Pride Factor**: Every Indian shares "Our ISRO graph!"
✅ **Viral**: College fests, Science Olympiads, #ISRO Twitter
✅ **Timely**: Gaganyaan 2026 hype + Chandrayaan-4 news
✅ **Simple**: Even Class 8 kids understand "rocket family"
✅ **Resume Gold**: "Built ISRO Knowledge Graph" = instant interview call
```

Quick Start (1 Weekend):

```
1. pip install neo4j langchain spacy
2. kaggle datasets download sudhanshukumar1309/isro-satellite-list
3. npx create-react-app isro-graph
4. docker run neo4j
```

```
5. 4 hours later: Live demo at https://your-isro-graph.vercel.app
```

Demo Query People Ask:

"Show path from Aryabhata (1975) → Chandrayaan-3 (2023) → Next Moon Mission?"

Answer Graph Shows: Aryabhata → SLV → PSLV → Chandrayaan → Next Lunar → Blue Moon Flag 2028! 🇮🇳🚀

Build this = Hero status at next family function! Perfect patriotic project blending technical skills + national pride.
